1-BOB: Hardware — Kompyuter Qurilmalari ▲

CPU · GPU · RAM · HDD/SSD · Motherboard · PSU · Monitor — 11 dars

ASOSIY CPU (Protsessor)

- › Yadro soni (Core count) — parallel bajarish
- › Chastota (GHz) — tezlik ko'rsatkichi
- › Socket turlari: Intel LGA, AMD AM4/AM5
- › Cache xotira: L1, L2, L3
- › TDP — issiqlik chiqarish (Watt)

ASOSIY RAM va Xotira

- › DDR4 vs DDR5 — tezlik va voltaj farqi
- › Dual Channel — 2 planka = 2x tezlik
- › XMP/EXPO profili — overclocking
- › Xotira ierarxiyasi: Register → Cache → RAM → SSD → HDD

ASOSIY HDD, SSD, NVMe

- › HDD: magnit disk, arzon, sekin (100–150 MB/s)
- › SATA SSD: tez, qimmat (~500 MB/s)
- › NVMe M.2: eng tez (3000–7000 MB/s)
- › USB flash: FAT32, exFAT, NTFS formatlari

ASOSIY GPU va Motherboard

- › Integrated GPU — protsessorda, zaif
- › Dedicated GPU — alohida karta, kuchli
- › Motherboard form-factor: ATX, Micro-ATX, Mini-ITX
- › PCIe slotlar, RAM slot, M.2 slot
- › Chipset — qurilmalar boshqaruvchisi

ASOSIY PSU va Cooler

- › PSU: 80 PLUS sertifikati (Bronze, Gold, Platinum)
- › Watt hisoblash: CPU+GPU+boshqa = x1.2 zapas
- › Air Cooling: fan + radiator, arzon

ASOSIY Monitor va Korpus

- › IPS: yaxshi rang, keng burchak
- › TN: tez javob, arzon, rang zaif
- › VA: yaxshi kontrast, o'rta

- › Liquid Cooling: AIO, 240/360mm, samarali
- › TDP — sovitish quvvati Watt'da

- › Hz — kadryangilanish tezligi (60/144/240)
- › Korpus: Mid-Tower, Full-Tower, SFF

💡 MUHIM ESLATMALAR

CPU va Motherboard socket mos bo'lishi shart! RAM slot juftlikda (1+3 yoki 2+4). PSU quvvati hisoblanganda 20% zapas qo'shing. NVMe SSD SATA'dan 6–15x tez.

📄 IMTIHON SAVOLLARI — HARDWARE

1 CPU dagi "yadro soni" (core count) nima va bu nima uchun muhim?

2 DDR4 va DDR5 RAM larining asosiy farqlari nimada?

3 NVMe, SATA SSD va HDD tezliklarini solishtiring.

4 80 PLUS sertifikat nima va u nima uchun kerak?

5 Motherboard form-factor turlari va ularning farqi?

6 Integrated va Dedicated GPU farqi nima? Qaysi holda qaysi birini tanlash kerak?

7 Monitor panel turlari: IPS, TN, VA — har birining afzalligi?

2–BOB: Microsoft Office Dasturlari ▼

Word · Excel · PowerPoint — 6 dars

3–BOB: Windows OS — O'rnatish va Sozlash ▼

BIOS/UEFI · CMD · Task Manager · Regedit · RDP — 23 dars

4–BOB: Printerlar va MFU Qurilmalar ▼

Lazer · Inkjet · Tarmoq printeri · Skaner — 5 dars

5–BOB: Kuzatuv va Veb–Kameralar ▼

Analog · IP Kamera · PoE · NVR/DVR — 5 dars

6–BOB: Kompyuter Tarmoqlari ▼

Topologiyalar · IP/Subnet · Switch/Router · Wi-Fi · VPN — 15 dars

KOMPYUTER TIZIMLARI VA KOMPLEKSLARIGA TEXNIK XIZMAT

78 darslik · 156 soat · Barcha mavzular qamrab olingan

Omad tilaymiz imtihonda! 💪
